DETAILED ACTION

Allowable Subject Matter

Claims 1,3,4,7-9,11,12,15 and 16 are allowed.

The following is an examiner's statement of reasons for allowance: none of the prior art of record, taken individually or in combination, teach the concept of coils installed in an asymmetrical relationship with respect to the lens and a blade on which the magnet member is installed not in direct communication with the coils to avoid receiving the heat generated from the current applied to the coils.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references of Turner et al., US Patent 7,126,744, and Pae et al., US Patent 7,310,289, teach the same concept of asymmetric influence of focus coils but are not the same context or after the current application.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PARUL GUPTA whose telephone number is (571)272-5260. The examiner can normally be reached on Monday through Thursday, from 10 AM to 7 PM.
